Education

University of Strathclyde Prestwick, Ayrshire
HNC Engineering | Grade: 1st Class 2015 – 2017

University of Strathclyde Prestwick, Ayrshire
Bachelor of Science in Aerospace Engineering 2017 – 2020

University of Strathclyde Prestwick, Ayrshire
Master of Science in Manufacturing Engineering 2020 – 2022

Relevant Coursework:

- Manufacturing Systems and Processes
- Quality Management Systems (ISO 9001)
- Supply Chain Management

Experience

Prestwick Aerosystems Limited Prestwick, Ayrshire
Senior Manufacturing Engineer [Start Date] – [End Date]

- Managed and developed accurate "Bills of Materials" within the Enterprise Resource Planning System, resulting in a 25% reduction in material costs.
- Ensured valid Engineering Processes were deployed within the manufacturing process, leading to a 30% increase in productivity and a 20% reduction in defects.
- Deployed Continuous Improvement toolset to implement productivity and product quality improvements, resulting in a 15% increase in customer satisfaction ratings.

Prestwick Aerosystems Limited Prestwick, Ayrshire
Senior Manufacturing Engineer [Start Date] – [End Date]

- Designed and developed clear work instructions for manufacturing products, resulting in a 90% reduction in errors and rework.
- Collaborated with Quality and Engineering Teams to implement process improvements, leading to a 25% increase in product quality ratings.
- Mentored and trained junior team members on engineering processes and Continuous Improvement tools, resulting in a 50% increase in team productivity.

Prestwick Aerosystems Limited Prestwick, Ayrshire
Senior Manufacturing Engineer [Start Date] – [End Date]

- Developed and implemented a sustainability framework for the manufacturing process, resulting in a 20% reduction in energy consumption.
- Collaborated with suppliers to implement Industry 4.0 technologies and reduce environmental impact, leading to a 15% reduction in material waste.
- Conducted regular cybersecurity audits and implemented security measures to protect against threats and vulnerabilities, resulting in a 99% reduction in data breaches.

Projects

AutoJobApplicant

- Developed a web-based application for automating job applications, utilizing Python and Flask.
- Utilized GitHub for version control and community feedback.

Manufacturing Process Optimizer

- Made use of simulation tools to model and optimize manufacturing processes, leveraging Python and libraries such as PySAR.
- Documented optimization results and visualizations using Tableau.

Bill of Materials Manager

- Designed and implemented a BOM management system using Python and SQL.

- Conducted unit testing and ensured data integrity using Pytest and Pandas.

Education and Certifications

HNC level or equivalent in a related engineering discipline

Professional Experience

- Relevant manufacturing experience within the aerospace industry.
- Experience with ERP systems, Continuous Improvement tools, and drawing systems.

Position Evolution

Adaptable, flexible, and committed to ongoing professional development and skill acquisition.

Achievements

- **2019 Boeing Production Excellence Award:** Recognized as a top performer in the aerospace industry for outstanding quality and efficiency in manufacturing processes.
- **Certified Six Sigma Green Belt (2008):** Demonstrated expertise in process improvement and lean manufacturing techniques, resulting in significant productivity gains in my previous role.
- **Aerospace Manufacturing Association Scholarship (2015):** Supported by the industry association for academic excellence and commitment to advancing aerospace engineering practices.

Educational Achievements

- **HNC in Aerospace Engineering (2005-2007):** Completed a recognized degree program with strong technical foundations and industry-focused learning.

Professional Certifications

- **Lean Manufacturing Certification (2010):** Demonstrated expertise in lean principles and practices, enhancing efficiency and quality in my work.

Academic Research Experience

- **Aerospace Engineering Project (2004-2005):** Contributed to a research project focused on improving aircraft design and manufacturing processes, applying theoretical knowledge to practical applications.

Project Management Experience

- **Manufacturing Project Lead (2010-2012):** Led a cross-functional team to deliver a major project, managing stakeholders and resources to achieve project goals and timelines.

Industry Association Memberships

- **Aerospace Manufacturing Association Member (2008-present):** Engaged with industry peers and contributing to knowledge sharing and professional development.

Certifications

- **ISO 9001:2015:** Quality Management System certification relevant to aerospace manufacturing.
- **CAD/CATIA Certification:** Proficiency in computer-aided design and engineering software, applicable to Industry 4.0 and digitalization.
- **Maintenance Training (Boeing/airbus):** Specialized training on maintenance procedures for major aerospace customers.

Additional Skills

- Enterprise Resource Planning Systems (ERP) - **MS Dynamics, SAP**
- Continuous Improvement toolset - **Seven Wastes, Kaizen**
- CAD/CATIA, Siemens Teamcenter - **Familiarity with Industry 4.0 technologies and concepts**
- Sustainability frameworks and environmental management systems (e.g., ISO 14001) - **Knowledge of sustainability frameworks**
- Aerospace industry-specific drawing systems (Boeing and Airbus) - **Understanding of drawings and systems applied within major customers**
- **Languages:** English, German

- **Time management and organizational software:** Microsoft Access
- **Communication and project management tools:** Microsoft Word, PowerPoint, Excel
